

MFI

Cybersecurity consultant / IAM specialist

INTRODUCTION

As cybersecurity expert with more than 8 years of experience, MFI specializes in Identity and Access Management. After a first experience as an IAM solution integrator in the banking sector, MFI took a position as a PAM architect and then as a project manager. He then worked for 5 years as a senior consultant and then as a managing consultant in various accounts. At the beginning of 2022, he joined a cybersecurity pure-player, where he carried out various missions to support the implementation of IAM solutions (mainly **PingIdentity**, **Usercube** and **CyberArk**), project management, definition of identity management kinematics and deployment of access solutions. MFI also teaches its field at the ECE engineering.

SKILLS

- Identity and Access Management
- IAM Solutions: Usercube, SailPoint, EntraID
- AM/cIAM Solutions: Ping, Forgerock
- PAM Solutions: CyberArk, Wallix, IBM
- Cloud environment: AWS, Azure, Google...
- MS AD infrastructure components, databases, LDAP directories, etc.
- Project Management
- Opportunity studies and development of Business Cases
- Choice of solutions and suppliers

Training Courses & Certifications

Efrei, 2016

Cybersecurity IT Engineer

Multiples certifications in IAM, including Microsoft, PingIdentity, CyberArk and Usercube.

MFI

Cybersecurity consultant / IAM specialist

SIGNIFICANT ASSIGNMENTS <5 YEARS

Rolex - IAM Project Director

Period June 2023 - December 2023

Role Project Director

Mission Ensure the landing of the Usercube project with the teams and management

- Ensure the design of the solution in joint work with the client and the publisher;
- Support the project manager in the highlights of the project;
- Ensure the integration of the tool in a demanding international context;
- Act as an interface between management and the project team;
- Challenge the client's ambitions to maximize the project's chances of success.

TotalEnergies - IAM Architect

Period May 2022 - December 2023

Role IAM Architect

Mission Establishment of the IAM Strategy and Security Architect

- Gathering the desired ambition of the program and the important elements of the IAM roadmap from the architecture manager;
- Analysis of the existing situation (technical architecture, use of tools such as EntralD and Usercube), proposal of areas for improvement;
- "Seminar" workshops to help stakeholders assess their maturity and position themselves (according to GARTNER methodology);
- Maturity assessment workshops on the identity tools and services in place;
- Multiple contributions to architectural files and passage to the architecture committee.

RMA - cIAM Architect

Period March 2022 - December 2023

Role cIAM Consultant

Mission Customer Authentication Strategy and IAM Project Management

- Definition of the customer authentication strategy, aligned with the company's objectives and in line with the group's standards.
- Advice to digital and marketing teams for an optimal and secure customer experience.
- Detailed elaboration of specifications, technical and functional specifications.
- Complete project management, including the integrator's challenge to ensure a quality implementation, while guaranteeing regulatory compliance.

Cybersecurity consultant / IAM specialist

Floa Bank - cIAM Project Manager

Period November 2021 - February 2022

Role IAM & PAM Project Manager

Mission Definition of the cIAM architecture and project management

- Led the integration team for a customer authentication project via PingIdentity for mobile and web platforms;
- Coordination of marketing, digital, architecture, and development teams to define, create, and validate technical and functional specifications;
- Complete project management, ensuring an implementation that meets compliance requirements while respecting deadlines and budget;
- Supervision of the deployment of secure authentication solutions in "infra as code" mode guaranteeing an optimal user experience and good scalability.

ING - Retail France

Period March 2018 - December 2020

Role IAM Project Manager

Mission Application of the IAM criteria of the NIST model on the France entity

- Compliance of ING's IAM France entity by following the NIST framework (IAM criteria);
- Management of the team of IAM specialists (3 FTEs) and cross-functional teams (helpdesk, support, business lines);
- Migration of IAM tools and to an RBAC model;
- Change management with managers.

Ministry of Culture and Communication - Cross-functional IT Department

Period December 2019 - December 2021

Role IAM & PAM Project Manager

Mission IAM & PAM Integration Project Management

- Needs analysis and advice on the target architecture (directory, federated access, privileged access for 20,000 identities);
- Analysis and choice of suppliers, subdivision of the project, management of PoCs and then pilots;
- Integration of selected products (CyberArk, Usercube, Keycloak) and management of project teams (10 FTEs);
- Migration of IAM populations;
- Definition of RUN procedures and implementation of the associated TMA.

Cybersecurity consultant / IAM specialist

Paris City Hall - Identity Department

Period August 2019 - December 2021

Role IAM & PAM Project Manager

Mission PAM Integration Project Management

- Responsible for PAM integration projects (CyberArk, Conjur) with identity bodies;
- Definition of the roadmap, qualification of needs;
- Advice on implementation, change management with business lines, democratization of the program, demonstration of PAM products;
- Management of the implementation system (4 FTEs).

Crédit Agricole - CA-GIP (ex-SILCA)

Period August 2019 - January 2022

Role IAM/PAM & Delivery Exec Architect

Mission Service delivery management and management for Sogeti IAM engagements

- Consulting on product architecture (CyberArk & Wallix), writing technical recommendations related to standards and regulations;
- Sogeti representative for IAM and PAM engagements, management of Engagement Managers and Service Delivery Managers of CAGIP services;
- Project management, customer roadmap and managerial escalations.

Faurecia - operational safety

Period 16 months (January 2018 - August 2019)

Role PAM Project Manager

Mission Migrating users and increasing the scope of the PAM program

- Preparation and conduct of interviews with representatives of operational teams, management and third-party maintainers to gather needs;
- Formalization of communication materials for employees and management to present elements of answers to the questions identified;
- Integration of the teams concerned on CyberArk (onboarding of more than a thousand users) on the identified perimeters;
- Updated the strategy and trained the client's internal teams to continue the integration.
